

公司介绍 Company Profile

Hunan Jingzheng Equipment Manufacture Co., Ltd, established in 1993, is a private science and technology professional company which is occupied in the design and manufacture of polyurethane equipment. Going through more than 20 years development, our company has become the leading enterprise of polyurethane equipment in China and the professional manufacturer which phase out ODS entirely in Chinese polyurethane industry.

湖南精正设备制造有限公司系从事聚氨酯装备机械的设计与制造的民营科技型专业公司，历经二十几年的发展，已成长为我国聚氨酯装备机械的骨干企业和中国聚氨酯行业整体淘汰ODS的专业制造商。

The main products of our company: the high pressure foaming machine, laminating machine, PU sandwich panel line and all kinds of production line for making PU products, raw material premixing & storage delivery system and elastomeric casting machine etc. 公司的主要产品为高压发泡机、层压机、连续板材生产线、原料预混、原料储存等聚氨酯系列装备机械。

We have strong abilities in technical innovation and market development. As we have innovative design, consummate manufacture, best products and approving service, we have provided a variety of PU equipment to many domestic and overseas enterprises. Such as Tian-Teng, Changzhou Jingxue, Beijing Huadu Maohua, Wanhua, Haier, Hisense, XCD, Himin, Japan Morita, Zhengzhou Yutong, Aulia, FAW-Volkswagen, Johnson, Control, Lear, BASF, Tianjing Jingnieng, Harbin Thermal Power etc. Our products have been exported more than ten countries, and we have gained the trust among the customers in domestic and overseas markets.

公司具有较强的技术创新能力和市场开发能力。以创新的设计精湛的制作，一流的产品和满意的服务为河南天丰、常州晶雪、安徽艾米伦特、北京茂华、阳湖制冷、海尔、海信、一汽大众、美国江森、美国李尔、烟台万华、德国巴斯夫等国内外众多企业，提供了大量的聚氨酯装备机械，产品还出口十多个国家，得到了国内外用户的信赖。

湖南精正设备制造有限公司
 HUNAN JINGZHENG EQUIPMENT MANUFACTURE CO., LTD

精工制作 正气经营

夹心板连续生产线 Continuous sandwich panels production line

Double belt press machine 双履带成型机

Adopting electric precise screw for up and down lifting for double belt, it can adjust thickness on line during running, adjustment accurate 0.1mm; Chain plate is adopted corrosion resistance and high strength alloy steel to process for rust-proof, surface roughness is less than Ra1.6, the flatness of adjacent chain plate is controlled in $\pm 0.05\text{mm}$.
双履带采用电动精密螺杆上下升降,可以在运行中在线调节厚度,调节精度0.1mm;为防止生锈,链板采用耐腐蚀高强度合金钢加工,表面粗糙度小于Ra1.6,相邻链板平面度控制在 $\pm 0.05\text{mm}$ 内。
Separately heating for upper and down chain plate, and control heating evenly, 上下链板单独分开加热系统,控制加热均匀。

Hydraulic uncoiler 液压开卷机

2 pieces or 4 pieces of hydraulic decoiler, double decoiler can continue to work, one for normal work, one for spare.
2个或4个液压开卷机主动开卷,双头开卷机可以不停线工作,一个正常工作,一个准备。

Roll forming machine 成型机

It can produce all kinds of sandwich panel, such as roof panel, wall panel, cold storage panel etc.
可生产屋面板、墙面板、冷库板各种不同板型

Material distributing trolley 布料小车

Adopting one or two pieces of mixing head to perform cross distribution, driven by servo, distribution accurate.
采用一个或两个混合头交叉布料,伺服驱动,布料精准。

Mineral wool loading line 矿物棉上料线

Used for loading, cutting auto feeding and auto discharging for mineral wool.
用于矿物棉的装载、切割、补料和自动排料。

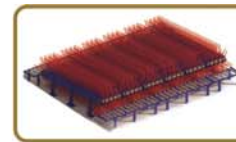

Stacker 码垛机

It consists of turnover mechanism, vacuum cup and conveyor belt. The turnover mechanism performs 180° turn.
由翻转机构、真空吸盘、传输带等组成。翻转机构对屋面板进行180度的翻转。

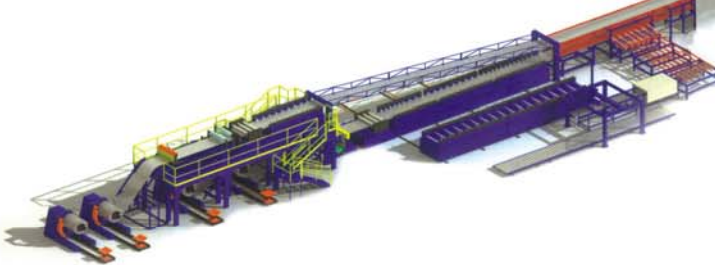

Cross Cutter 切割机

Two-way cross cutting with saw band, the front end with cutting saw, which can achieve two-way cutting of roof panel.
采用带锯双向交叉切割,前端带有切割盘锯,实现屋面板的双面切割。

Cooling machine 凉板机

In order to prevent products deformation caused by heat in production, the panel after cutting is put upright and natural cooling.
为防止生产过程中的热量引起产品变形,将切割后的板材垂直摆放,自然冷却。

Mull components high pressure foaming machine 多组份高压发泡机

It is suitable for producing PUR or PIR, it can be 2 components, 4 components or 6 components and also can reserve the interface of cyclopentane foam.
适合于生产PUR或PIR,可以是两组份、四组份或六组份,也可预留环戊烷发泡接口。
